Facility Telephone #:	(616) 296-9020
Capacity:	4
Program Type:	DEVELOPMENTALLY DISABLED

II. Purpose of Addendum

The licensee requested the facility's capacity be increased from three residents to four residents.

III. Methodology

On 09/05/2026, licensee Stacie Strong requested a modification to the license, increasing the capacity from three residents to four residents.

On 09/08/2026, I observed bedroom #2, which measures 10'X12'4" and 2'2"X7' for a total of 138 square feet, which meets the requirements for a resident bedroom for two residents.

I also reviewed the Original Licensing Report and discovered that the total living space was measured at 362.8 square feet. However, since the original report, the bedroom formerly used by the proprietors was converted into a family/play room. That room measures approximately a total of 234 square feet, making the total living space of the home 596.8 square feet. Considering that 10 people would live in this home if counting the residents and the licensee and her family, there would still be far more than enough required living space.

IV. Description of Findings and Conclusions

The home has sufficient space to add another resident bed.

V. Recommendation

I recommend that the facility be increased to four residents.
