Dear Mr Shuler,

In response to plan of Correction has enclosed in for to your attention
Completion of findings & notes to be completed on Helms Electric Co
Exhaust units in different areas,

We monitor & inspect all areas of building or daily basis and will
Continue to do so. Poor Communication from staff has caused some of
these problem. Re instruction of staff duties & responsibility may help
in future inspection.

We at Heritage Meadows are concerned and try to do the right
things for our residents and State rules & regulations.

We are thankful for your help and understanding during
these difficult times. We will continue to monitor and do the
best we can at Heritage Meadows to resolve all findings & Circumstances.

Again we appreciate your help & understanding of all stages of

RE: Heritage Meadows Long Term Care Facility - HA Biennial Construction Survey
6659 Private School Road
Oxford Granville County
FID #940532 Hal039001

Dear Mr. Bradshaw:

The Division of Health Service Regulation (DHSR) - Construction Section conducted a Biennial Survey of your facility on 11/08/2017. As a result of this survey, deficiencies were cited which required an acceptable Plan of Correction that was to be returned to our office by 12/01/2017.

On 12/20/2017 and 02/06/2018, Suzanna Fay, a DHSR-Construction Surveyor, spoke with Charles Bradshaw regarding the Plan of Correction that has not been returned to DHSR-Construction Section.

C 189	Continued From page 9 Findings on November 8, 2017: a. Room 18 - the corridor door was propped open using a chair. b. Room 17 - the corridor door was propped open. Further observation revealed that many of the sleeping room doors are equipped with torsion hinges. Sleeping room doors in an I-2 Institutional Occupancy are not required to be self closing. 3. Based on observation there is a failure to maintain the facility's fire safety equipment in a safe operating condition. Occupants in the smoke compartment could be exposed to smoke or fire if doors do not completely close and latch to help limit the spread of smoke or fire to the area of origin. Findings on November 8, 2017: a. Room 19 - the door latch is heavily damaged and the door does not close and latch. b. Room 17 - the corridor door does not latch. c. Room 5 - the door hardware is loose. The door catches on the frame and does not latch. 4. Based on observation the facility did not maintain electrical emergency/safety lighting equipment in safe operating condition. This could effect occupants of the facility if egress paths and exits were not illuminated during a power outage. Findings on November 8, 2017: a. West wing TV Room - the emergency light did not illuminate when tested. b. The emergency light by Room 15 had a very weak illumination. c. Nurse's office - the emergency light did not illuminate when tested.	C 189	<i>Completed ✓</i> <i>Completed ✓</i> <i>Doors machined to the problem</i> <i>A. Completed by Maintenance</i> <i>B. C 189	Building Equipment Maintained Safe, Operating SECTION .0300 - PHYSICAL PLANT 10A NCAC 13F .0311 OTHER REQUIREMENTS (a) The building and all fire safety, electrical, mechanical, and plumbing equipment in an adult care home shall be maintained in a safe and operating condition. (k) This Rule shall apply to new and existing facilities with the exception of Paragraph (e) which shall not apply to existing facilities. This Rule is not met as evidenced by: 1. Based on observation fire safety equipment has not been inspected to assure it has been maintained in a safe and operable condition. Occupants of the facility could be effected if fire safety equipment in the smoke compartment did not operate when needed to provide fire protection. Findings on November 8, 2017: a. The fire extinguishers throughout the facility did not have their current annual inspection tags. Also, staff was not performing monthly service checks on the extinguishers and logging in the date of the inspections. b. Kitchen - the range hood suppression system was not being inspected monthly by the staff. 2. Based on observation there is a failure to maintain the buildings's fire safety components in a safe operating condition. Any unapproved device used to keep a door open is an impediment to quickly closing the door. The occupants in the facility could be effected if doors cannot be closed as required so as to limit the spread of smoke and/or fire to the area of origin.
