D 079	Continued From page 1 times to prevent falling over, being dropped, and striking against other tanks violently. Review of the facility's license revealed: -The facility was licensed as a Special Care Unit (SCU) effective 01/01/26 for a capacity of 32 residents. -The expiration date of the facility's license was 12/31/26. Review of the facility's census on 04/29/26 revealed the facility's census in the SCU was 24 residents. Observation of the medication room on 04/29/26 at 4:00pm revealed: -There were three portable oxygen (O2) tanks sitting upright on the floor in the left corner beside the medication cart. -Two of the O2 tanks had green tabs on the top, indicating that they were full. -All 3 O2 tanks were unsecured, not in a rack, cart, or holder. Interview with a personal care aide (PCA) on 04/30/26 at 8:40am revealed: -PCAs could change out the O2 tanks when they are empty. -The O2 tanks were stored in a crate in the resident's room. -The green tag on the O2 tanks meant that the O2 tank was full. -The O2 tanks could fall over and explode if not stored in a crate. Interview with a medication aide (MA) on 04/29/26 at 4:00pm revealed: -She removed the O2 tanks from a resident's room this morning (04/29/26) because she was concerned that the tanks were in the room, but	D 079

D 079	Continued From page 2 the resident was not on oxygen. -She did not know the O2 tanks were supposed to be in a rack, cart, or holder. -The O2 tanks were not in a holder in the resident's room when she removed them. -She told the MA Supervisor about the O2 tanks and was told to put the tanks in the medication room. -She had not informed the Special Care Coordinator (SCC) about the O2 tanks. -She was unsure if the MA Supervisor informed the SCC about the O2 tanks. Interview with another MA on 04/29/26 at 6:30pm revealed: -O2 tanks were stored in crates in the resident's room or in the medication room. -If there was a green tag on the O2 tank, that meant the O2 tank was full. Interview with the SCC on 04/29/26 at 5:18pm revealed: -The O2 tanks could not sit on the floor; they were to be kept in a crate. -The O2 tanks were stored in the resident's closet or in the medication room. -A PCA made rounds and found several O2 tanks in a resident's room, not in a crate, and placed them in the medication room and did not place them in a crate. -The resident's crate was in their closet. -All staff were responsible for ensuring that the O2 tanks were kept in a crate. -The O2 tanks could have fallen over and exploded and injured the residents and staff. -If the O2 tank had a green tag on, it meant that the O2 tank was full. Interview with the Health and Wellness Director (HWD) on 04/29/26 at 4:16pm revealed:	D 079

D 113	Continued From page 4 This Rule is not met as evidenced by: Based on observations, interviews, and record reviews, the facility failed to ensure the hot water temperatures were maintained between 100 to 116 degrees Fahrenheit (F) in resident's bathrooms as evidenced by 4 of 19 fixtures with water temperature ranging from 117.3 to 120.4°F. The findings are: Observation of water temperatures on 04/29/26 from 9:10am to 11:08am in resident bathrooms revealed: -In room D115 the hot water temperature of the sink was 120.4°F. -In room shared bathroom of D105 and D106 the hot water temperature of the sink was 118.4°F. -In room D108 the hot water temperature of the sink was 117.3°F. -In room B106 the hot water temperature of the sink was 118°F. Interview with a resident in room D115 on 04/28/26 at 9:15am revealed: -She had no issues with the hot water temperature. -She had never been burned by the hot water. -If she needed hot or cold water, she knew how to adjust the temperature. -She did not require staff assistance with using the sink. Interview with a resident in room D108 on 04/28/26 at 9:25am revealed: -The water was never too hot. -She knew how to adjust the hot and cold water to get the temperature she wanted. -She used the sink without assistance from staff. D 125	Continued From page 12 Readopted Eff. July 1, 2021. This Rule is not met as evidenced by: Based on interviews and record reviews, the facility failed to ensure that 2 of 7 sampled staff who administered medications to residents completed the state approved 5-hour and 10-hour or 15-hour medication aide training (Staff B, Staff E) prior to administering medications and 1 of 7 sampled staff (Staff C) did not have the medication skills competency validation prior to administering medications. The findings are: 1. Review of Staff B's personnel record on 04/29/26 revealed: -Staff A was hired on 03/31/26 as a medication aide (MA). -There was no documentation that Staff A completed the state approved 5-hour and 10-hour, or 15-hour medication aide training course. -There was documentation Staff A completed the medication clinical skills checklist. -There was documentation that Staff A passed the MA test on 02/15/18. Review of a resident's April 2026 electronic medication administration records (eMAR) revealed there was documentation that Staff B administered medications on 04/24/26, 04/27/26, and 04/28/26. Attempted telephone interview with Staff B on 04/29/26 at 4:30pm was unsuccessful. Refer to interview with the Health Wellness	D 125

the physician.
-Staff were to monitor the resident for signs and symptoms of a serious adverse reaction.
-Staff were to enter a narrative note on the resident's status during every shift for 48 hours after a medication error occurred and notify the resident's responsible party of the medication error.
-Staff were to complete an Internal Occurrence Report Form and any state regulatory reporting requirements.

1. Review of Resident #3's current FL2 dated 11/04/25 revealed:
-Diagnoses include dementia with behavioral disturbance, end-stage renal disease on hemodialysis, hypertension, polycystic kidney disease, secondary hypothyroidism, and hypertensive chronic kidney disease stage 5.
-The resident was ambulatory.
-The resident was intermittently disoriented.
-The resident's current level of care was Special Care Unit (SCU).

Review of Resident #3's Resident Register revealed the resident's admission date was 09/24/24.

Review of Resident #3's current care plan dated 03/23/26 revealed:
-The resident required assistance with activities of daily living such as toileting, grooming and personal hygiene.
-The resident required dialysis treatment three times a week.

Review of Resident #3's hospital medical records dated 04/23/26 revealed:
-The reason for the visit was vascular access problem for occluded fistula to right upper arm.

significant memory loss, and must be directed.
-The resident required limited assistance with toileting, ambulation, bathing, dressing and grooming.
-The resident required supervision with eating and transferring.

Review of Resident #2's Incident Report dated 04/11/26 on 04/30/26 at 2:05pm revealed:
-The incident occurred at 9:30am on the first shift.
-The incident classification was Medication Error.
-The incident occurred in the hallway.
-Resident #2's vitals were taken and her blood pressure was 177/80, her pulse was 70 and her temperature was 97.4.
-Resident #2's pain level was 0.
-Resident #2 was transferred to the hospital via EMS.
-The Health and Wellness Director (HWD) was notified at 9:40am.
-Resident #2's primary care provider (PCP) was notified at 7:37pm.
-Resident #2's family was notified at 7:37pm.
-Resident #2 had no injuries.
-The medications administered to Resident #2 in the 12 hours prior to 04/11/26 at 9:30am were administered at 9:24am and included: Fluticasone 50mcg (used to treat allergies), Risperidone 0.25mg (used to treat mental health conditions), Memantine 10mg (used to treat Alzheimer's Disease), Furosemide 20mg (used to treat fluid retention), Guaifenesin 400mg (used to treat chest congestions), Sertraline 50mg used to treat mental health conditions), and Eliquis 5mg (used to prevent and treat blood clots).

Review of Resident #2's Emergency Medical Services (EMS) report dated 04/11/26 revealed:
-EMS was called for Resident #2 on 04/11/26 at 7:33pm.

D 273	Continued From page 28 -Resident #2 was administered fluids. -Resident #2 showed improvement in alertness throughout transport and no negative changes were noted -EMS arrived at the hospital at 8:33pm. Review of Resident #2's hospital records revealed: -Resident #2 presented after accidental administration of another resident's medications including extra doses of Furosemide, Hydralazine, Amlodipine, Primidone, Sertraline, and Vitamin D. -Medications administered to Resident #2 that were not on her medication list included Amlodipine 2.5mg, Iron Sulfate 324mg, Furosemide 40mg, Hydralazine 50mg, Primidone 50mg, Sertraline 100mg, Sodium Bicarbonate 650mg, Trospium 20mg, and Vitamin D3 50mcg. -At approximately 9:00am on 04/11/26, Resident #2 was inadvertently given another resident's medications in addition to her own. -EMS was activated about one hour prior to the emergency department arrival when the facility recognized the error. -Resident #2 remained at baseline throughout the day per facility staff and EMS. -EMS noted Resident #2 was initially mildly sedated and responsive to verbal stimuli, improving during transport. -Resident #2 felt normal and denied pain, fever, nausea, vomiting, diarrhea, dizziness, shortness of breath, and dysuria (painful urination). -Resident #2's baseline functional status at the facility was mostly independent with self-care. -Resident #2 was reported by facility staff to be at her baseline with no new symptoms such as nausea, vomiting, diarrhea, dizziness, or shortness of breath. -The exam of Resident #2 revealed alertness	D 273

near baseline and a strong urine odor.
-Differential diagnosis included but was not limited to accidental medication overdose, electrolyte imbalance, acute kidney injury and urinary tract infection.
-Accidental ingestion of another resident's medications raised concern for toxicity or adverse effects though the resident was at baseline with no acute symptoms.
-Extra Furosemide and antihypertensives may cause electrolyte disturbances, particularly hypokalemia (abnormally low levels of potassium) necessitating laboratory evaluation.
-Over diuresis from additional Furosemide could precipitate renal dysfunction, warranting assessment of kidney function and electrolytes.
-Strong urine odor raised suspicion for urinary tract infection (UTI) though no urinary symptoms were reported.
-Resident #2's labs and urinalysis were reassuring, and Resident #2 was stable for discharge at 2:09am on 04/12/26.

Interviews with a medication aide (MA) on 04/30/26 at 8:51am and 11:31am revealed:
-She worked as a MA and a personal care aide (PCA).
-She had been a PCA for 2 years and was familiar with the residents.
-On 04/11/26, she worked as a MA and had been a MA for approximately 5 days.
-On 04/11/26, she was on her way to administer medication to the resident whose room was next door to Resident #2's room. (Time unknown.)
-She saw Resident #2 about to fall so she went to get her walker out of her room.
-She had the medication and water for the other resident in one hand while she grabbed Resident #2's walker with the other hand.
-When she handed Resident #2 her walker, she

D 273	Continued From page 33 Interview with the HWD on 04/29/26 at 4:22pm and 5:36pm revealed: -The MA notified her that she administered the wrong medications to Resident #2 on 04/11/26. (Time unknown.) -The MA that came in at 3:00pm on 04/11/26 informed her that she felt Resident #2 was not at baseline due to slurred speech and pale skin. -She told the MA to call EMS. -She told the MA to check Resident #2's vital signs, monitor her and notify the PCP. Second interview with the HWD on 04/30/26 at 12:40pm revealed: -Per policy the MA should have immediately called 911, obtained Resident 2's vital signs, and called the PCP, then called the responsible party and complete an incident report. -She did not know why she did not have the MA follow the policy. -The Regional Director of Resident Care (RDRC) reviewed what should have taken place when Resident #2 was administered another resident's medication: obtain vital signs, notify PCP and resident's family and follow up to see how Resident #2 was doing. -Resident #2 went to the hospital before she notified the RDRC. -She did not follow up on Resident #2 to ensure that the incident report had been completed and the PCP and family were notified. Interview with the Administrator on 04/30/26 at 1:37pm revealed: -If there was a medication error, the MA was to contact the HWD. -The HWD was responsible for talking to the MA about the error and contacting the Administrator, the RDRC, the PCP and the family. bladder and could have caused Resident #2 to have dry skin, similar to allergy medication.
-Ferrous Sulfate 324mg was used as a supplement for low iron and could have caused Resident #2 to have elevated iron levels.
-Sodium Bicarbonate 650mg was used to replenish electrolytes. There were no concerns with this medication.
-Tylenol 500mg was used to treat pain and fever. There was no concern with this medication.
-Vitamin D3 50mcg was used as a supplement to increase Vitamin D levels. There was no concern with this medication.
-There could have been interactions between the medications that Resident #2 took and the medications she received that belonged to another resident.
-Since Resident #2 was only administered one dose there was less concern.
-The increase in the number of blood pressure (BP) medications Resident #2 was administered could have increased the side effects of altered mental status, fainting, dizziness, increased fall risk, hypotension, paleness, and diaphoresis.

Interview with Resident #2's PCP on 04/29/26 at 5:19pm revealed:
-Her first visit with Resident #2 was 04/04/26.
-She was not sure if she was aware that Resident #2 went to the hospital after being administered another resident's medication; she did not see any correspondence from the facility regarding the incident.
-If she had been notified, she would have told the facility to monitor for somnolence (drowsiness) and hypotension (low blood pressure) as these could be the side effects for someone who did not need the medications that were administered.

Based on observations interviews and record

D 273	Continued From page 36 reviews, Resident #2 was not interviewable. Attempted telephone interview with Resident #2's family member on 04/29/26 at 11:57am was unsuccessful. The facility failed to ensure referral and follow-up to meet the acute health care needs for 2 of 5 sampled residents (#2, #3). The facility did not obtain an order to remove a dressing at the resident's dialysis access site who returned to the dialysis center with the dressing still on access site in place for two consecutive days. On 03/21/26, 04/07/26, and 04/21/26, the resident returned to dialysis with the dressing in place a total of 3 times which caused dialysis access site to clot resulting in the resident missing dialysis treatments. On 04/21/26, the resident was unable have her dialysis treatment due to a clotted access site, which resulted in a hospital admission, dialysis missed for 5 days, and elevated blood work (#3). On 04/11/26, Resident #2 was administered nine medications in error in addition to her regular scheduled medications around 9:30am and there was no notification to the resident's primary care provider (PCP) or referral to the emergency department for 10 hours, with emergency medical services (EMS) being contacted at 7:33pm. This failure resulted in substantial risk of serious physical harm and constitutes a Type A2 violation. The facility provided a plan of protection in accordance with G.S. 131D-34 on 04/29/26 for this violation. CORRECTION DATE FOR THE TYPE A2 VIOLATION SHALL NOT EXCEED May 30, 2026.	D 273

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETE DATE
D 358	Continued From page 41 -If the HWD was not available, the report would be made to the nurse on duty of the Administrator. -The prescribing physician was immediately notified of the medication error. -When reporting the error to the physician, staff were to report the facts of the incident and document and follow the instructions provided by the physician. -Staff were to monitor the resident for signs and symptoms of a serious adverse reaction. -Staff were to enter a narrative note on the resident's status during every shift for 48 hours after a medication error occurred and notify the resident's responsible party of the medication error. -Staff were to complete an Internal Occurrence Report Form and any state regulatory reporting requirements. Review of Resident #2's current FL-2 dated 01/18/26 revealed: Diagnoses included Alzheimer's Disease, hypertension, atrial fibrillation, coronary artery disease (CAD), peripheral artery disease, depression, anxiety and chronic pain. -The resident's level of care was Special Care Unit (SCU). Review of the Resident Register revealed Resident #2 was admitted on 01/21/23. Review of Resident #2's Incident Report dated 04/11/26 revealed: -The incident occurred at 9:30am on the first shift. -The incident classification was Medication Error. -The incident occurred in the hallway. -Resident #2's vitals were taken and her blood pressure was 177/80, her pulse was 70 and her temperature was 97.4. D 366	Continued From page 68 Refer to interview with the Health and Wellness Director (HWD) on 04/28/26 at 10:55am. Refer to interview with the Administrator on 04/28/26 at 11:09am. Interview with the MA on 04/28/26 at 10:33am revealed: -She had worked for the facility for 2 years. -She did not leave medications in the residents' rooms. -She observed the residents take their medications. -She passed medications on hall A today, 04/28/26. Interview with the Health and Wellness Director (HWD) on 04/28/26 at 10:55am revealed: -The MAs were supposed to observe the residents take their medications. -Medications were not supposed to be left in a resident's room. -Observing residents take their medications was taught during their MA training. -The Licensed Health Professional Support Nurse (LHPS) validated that the MAs knew how to administer medications. -She was not sure why the MA did not observe the residents take their medications. -She was concerned because depending on when they took the medications it could be too close to the next administration time and that the medications were not administered as prescribed. -It was important to give the residents their medications at the scheduled times. Interview with the Administrator on 04/28/26 at 11:09am revealed: -Medications should never be left in a resident's room.	D 366

TTB Knightdale

10A NCAC 13F. 0306(a)(5) Housekeeping and Furnishings

- Oxygen tanks were secured and placed in a storage area in the appropriate crates.
- Oxygen tanks will be stored upon arrival to community in a designated storage area in the appropriate crates.
- Staff will be educated in monitoring rooms and common areas for obstructions and hazards and reporting to leadership.
- DHW (Director of Health and Wellness)/MCC (Memory Care Coordinator)/Designee will check resident rooms and common areas weekly to maintain compliance.
- Date of Correction: 6/15/26

10A NCAC 13F .0311(d) Other Requirements

- Signs were immediately placed above affected sinks with temperatures above 116 degrees.
- Plumbing company was immediately called with a repair date of 6/28/26.
- Hot water temperatures will be monitored weekly or more often as needed by the Director of Facility Operations (DFO).
- Faucets with temperatures above 116 degrees will have signs placed above the sink.
- The DFO will report weekly temperatures to the Executive Director (ED) and temperatures out of compliance will be reported immediately to the ED.
- Temperatures will be maintained in the TELS system.
- Date of Correction: 6/15/26.

10A NCAC 13F .0403(a) Qualifications of Staff

- Administrative files will be audited for compliance for clinical staff to verify compliance with the NC State Medication Aide and other trainings required by North Carolina.
- The BOM (Business Office Manager) will audit the records and document in the staff tracker. The Executive Director/Designn will review the staff tracker for completion.
- Medication Aides without the documented training will not be allowed to administer medication.
- The BOM and ED will verify training documents upon hiring and before placing the staff member into the schedule.

Pamela Mayo, ED
6/5/26

1

TB Knightdale

- The BOM will audit the staff records quarterly. The ED/Designee will review the staffing tracker every six months for compliance.
- Date of correction: 6/15/26

10A NCAC 13F .0902 Health Care Referral and Follow Up

- Staff will be educated to use the Order Management system (a four file folder system) for physician orders, follow up visits and other paperwork related to resident care.
- The Resident Care Coordination form will be utilized for verify care follow up.
- The DHW/Designee will review new orders before being filed in the records to verify follow up.
- The DHW/Designee will contact the provider for clarification of orders and document in the resident record.
- Providers will be contacted by the DHW/Designee following medication errors and other health care incidents with notification also being sent to the county in the required time frame.
- The ED/Designee will review random orders weekly for follow up. Incidents will be reviewed regularly throughout the week during stand up to verify follow up.
- Date of correction: 5/30/26

10A NCAC 13F .0906(a) Other Resident Care and Services

- Residents and responsible party were notified when transportation dates changed.
- The community will continue to provide transportation for outside appointments on Tuesdays and Thursdays as in the residency agreement.
- Transport may be provided at other times if the facility is able.
- The DHW/Designee will review appointments weekly to verify transportation is available. If transportation is not available, the responsible party will be notified and documented in the resident record.
- Date of Correction: 6/15/26

10A NCAC 13F .1004(a) Medication Administration

- Medication Aides have been retrained in medication administration by a Registered Nurse.
- Training included Medication Administration, Medication Errors and Adverse Reaction policies.

Pamela Mays
6/15/26

TB Knightdale

- The DHW/Designee will conduct a med pass observation weekly on medication aide until all aides have been observed.
- The DHW/Designee will then randomly conduct med pass observations.
- These observations will be documented and the ED will review for compliance quarterly.
- Date of Correction: 5/30/26

10A NCAC 13F .1004(i) Medication Administration

- Medication Aides have been retrained in medication administration by a Registered Nurse.
- Training included Medication Administration, Medication Errors and Adverse Reaction policies, Observation of residents taking medications, and Documentation.
- The DHW/Designee will conduct a med pass observation weekly on medication aides until all aides have been observed.
- The DHW/Designee will then randomly conduct med pass observations.
- These observations will be documented and the ED will review for compliance quarterly.
- Date of Correction: 6/15/26

10A NCAC 13F .1212(a) Reporting of Accidents and Incidents

- Incidents and Accidents that require reporting will be sent to the county monitor in the required time frame based on the state regulation.
- The DHW/Designee will review incident/accident reports for completion and accuracy.
- The ED/Designee will review incidents and accidents at standup to verify compliance with this regulation.
- The ED/DHW/Designee will send the report to the county as required.
- Date of Correction: 6/15/26
