C 206	Continued From page 1 (5) resident's medications, including the name, strength, dosage, frequency and route of administration of each medication; (6) results of x-rays or laboratory tests determined by the physician or physician extender to be necessary information related to the resident's care needs; and (7) additional information as determined by the physician or physician extender to be necessary for the care of the resident. This Rule is not met as evidenced by: Based on record review and interview, the facility failed to ensure the residents' FL-2 was complete to include diet orders for 3 of 3 sampled residents (#1, #2, and #3). The findings are: 1. Review of Resident #1's current FL-2 dated 09/18/25 revealed: -Diagnoses included schizophrenia, dyskinesia, chronic kidney disease, and hypertension. -There was a checkmark next to the section listed for diet. -There was no diet order written on the current FL-2. Review of Resident #1's Resident Register revealed an admission date on 08/29/16. Review of Resident #1's record revealed there was no documentation of the resident's diet.	C 206	Going Forward the Administration will ensure that the ~~ted~~ residents' FL2's will be complete including the diet orders. She will reach out to ~~their~~ Primary Care provider

C 330	Continued From page 13 -The Administrator and the House Manager had not checked the blood glucose measurement sheets because she believed the MA was doing them properly. -She had serious concerns that staff administering Resident #2's insulin incorrectly could cause health problems. Telephone interview with Resident #2's primary care provider (PCP) on 05/19/26 at 1:00pm revealed: -Resident #2's endocrinologist provided the facility with sliding scale parameters for the MA to follow to properly administer his insulin. -Resident #2's Humalog sliding scale was 201-250 add 2 units, 251-300 add 4 units, 301-350 add 6 units, greater than 350 add 8 units. -He expected staff members at the facility to follow the sliding scale chart when administering insulin to Resident #2. -The outcome of Resident #2 being administered insulin incorrectly depended on the level of errors that occurred, two units of insulin administered incorrectly would probably not have any significant effect. -He was more concerned about Resident #2's blood glucose levels being low. -The errors that were done when administering Resident #2 his sliding scale insulin were mildly consequential. Attempted telephone interview with Resident #2's endocrinologist on 05/19/26 at 9:37am was unsuccessful. Based on observations, interviews, and record reviews it was determined that Resident #2 was unin terviewable.	C 330

C 330	Continued From page 14 The facility failed to ensure Resident #2 diagnosed with type 1 diabetes was administered sliding scale insulin as ordered. The medication aide incorrectly administered an incorrect dose of Humalog insulin to Resident #2 on 30 occasions from 03/01/26 to 05/19/26, during this time Resident #2's blood sugars ranged from 43 to 457. This failure was detrimental to the health, safety, and welfare of the Resident and constitutes a Type B Violation. The facility provided a plan of protection in accordance with G.S. 131D-34 on 05/19/26 for this violation. CORRECTION DATE FOR THIS TYPE B VIOLATION SHALL NOT EXCEED July 3, 2026.	C 330
