

State Rapid Response Investigative Public Report

Office of Health Facility Complaints

Maltreatment Report #: HL304258104M
Compliance #: HL304255160C

Date Concluded: February 9, 2024

Name, Address, and County of Licensee

Investigated:

Pathstone Crossing
710 Mound Ave
Mankato, MN 56001
Blue Earth County

Facility Type: Assisted Living Facility with
Dementia Care (ALFDC)

Evaluator's Name: Lena Gangestad, RN
Special Investigator

Finding: Substantiated, facility responsibility

Nature of Investigation:

The Minnesota Department of Health investigated an allegation of maltreatment, in accordance with the Minnesota Reporting of Maltreatment of Vulnerable Adults Act, Minn. Stat. 626.557, and to evaluate compliance with applicable licensing standards for the provider type.

Initial Investigation Allegation(s):

The alleged perpetrator (AP) neglected the resident by failing to log into the pendant system. Consequently, she was unaware the resident's call light had been on for over an hour resulting in a delay of care. The resident called 911 himself and transferred to the hospital for further evaluation.

Investigative Findings and Conclusion:

The Minnesota Department of Health determined neglect was substantiated. The facility was responsible for the maltreatment. While the AP did not log into the pager system, it was also true the facility did not provide her a pager for the call light system for the first half of the shift. The AP had not worked this unit before and was not familiar with the cares to be provided.

The investigator conducted interviews with facility staff members, including administrative staff, nursing staff, and unlicensed staff. The investigation included review of the resident record,

hospital records, facility incident reports, personnel files, and staff schedules. The investigation included an onsite visit, observations, and interactions between residents and facility staff.

The resident resided in an assisted living facility. The resident's diagnoses included diabetes and congestive heart failure. The resident's service plan including assistance with repositioning scheduled for 11 p.m. and toilet reminders at various intervals: 12:00 a.m., 2:00 a.m., 4:00 a.m., 5:50 a.m., and 10:00 p.m., and required assistance of one-person for transfer. Additionally, the resident's assessment indicated blisters on the resident's right lower leg.

At the beginning of the AP's night shift, the resident bumped his leg on his walker, causing a blood blister to break open and significant bleeding. He activated his call light for help. However, the resident's call light was on for over an hour without a response. The AP had not been provided a pager and was unaware of the resident's call light was activated. The resident was unable to control the bleeding and called 911 himself. Upon the arrival, the emergency medical technicians (EMT) waited at the door for fifteen minutes as the AP was uncertain what to do. Eventually, the resident was transferred to the hospital with an estimate blood loss of 150 cubic centimeters (cc).

During an interview, the AP confirmed she was from an agency and, while she had worked in the facility memory care unit before, this was her first time working in the assisted living unit at the facility, with which she was not familiar. The AP explained she was initially scheduled to work in the memory care, but the facility floated her out to work in the assisted living unit. The AP stated a facility employee had promised to show her around the unit and provide her with a pager but never did. As a result, she did not have the pager and was unaware of the necessary procedures. The AP stated when she saw EMT at the door she was not sure what to do so she ran to call for help and they transferred the resident to the hospital. After the resident was gone, the AP stated about halfway through the night shift a member of management arrived and gave her the pager only, no care sheet was provided. At this point she began to answer call lights and assisting residents. She stated she did not know which residents required safety checks, so she focused on responding to call lights.

During an interview, a member of management stated it was the APs third time working for the facility, but the first time in the assisted living unit. The manager stated the resident activated his pendant around 11:30 p.m., waited until 12:30 am, but no one responded so the resident called 911 himself. While the AP was not sure what to do, staff members from the memory care came to let the EMT in the unit, provided aid to the resident, and alert him to the situation so he came to the facility. The manager stated the AP had not logged into the pager system nor did she have a pager during the incident. The manager stated the AP was present but unprepared. The manager came to the facility at 2:00 a.m., helped in her log into the pager system, gave her a pager, printed a service schedule, and discussed it with her. He stated he stayed at the facility until sometime between 4-5 a.m. and thought the AP understood what to do and the charting system.

In conclusion, the Minnesota Department of Health determined neglect was substantiated.

Substantiated: Minnesota Statutes, section 626.5572, Subdivision 19.

“Substantiated” means a preponderance of evidence shows that an act that meets the definition of maltreatment occurred.

Neglect: Minnesota Statutes, section 626.5572, subdivision 17

“Neglect” means neglect by a caregiver or self-neglect.

(a) "Caregiver neglect" means the failure or omission by a caregiver to supply a vulnerable adult with care or services, including but not limited to, food, clothing, shelter, health care, or supervision which is:

(1) reasonable and necessary to obtain or maintain the vulnerable adult's physical or mental health or safety, considering the physical and mental capacity or dysfunction of the vulnerable adult; and

(2) which is not the result of an accident or therapeutic conduct.

Vulnerable Adult interviewed: No, attempted but did not reach.

Family/Responsible Party interviewed: No, attempted but did not reach.

Alleged Perpetrator interviewed: Yes.

Action taken by facility:

The AP was no longer working for the facility.

Action taken by the Minnesota Department of Health:

The responsible party will be notified of their right to appeal the maltreatment finding.

The facility was found to be in noncompliance. To view a copy of the Statement of Deficiencies and/or correction orders, please visit:

01480	Continued From page 1 by: Based on interview and record review, the licensee failed to ensure staff providing assisted living services were oriented specifically to the residents (R3 and R4) and the services to be provided for an agency unlicensed personnel (ULP-A) with records reviewed. Additionally, the facility failed to ensure ULP-A had the pager or pager log-in to monitor the call light system on the assisted living unit she was floated on to work which led to delayed reponse to call lights. R3 activated his call light after a fall with bleeding but when no response occurred R3 called 911 himself for transfer to the hospital. This practice resulted in a level three violation (a violation that harmed a resident's health or safety, not including serious injury, impairment, or death, or a violation that has the potential to lead to serious injury, impairment, or death), and was issued at an isolated scope (when one or a limited number of residents are affected or one or a limited number of staff are involved or the situation has occurred only occasionally). The findings include: R3 admitted on August 16, 2019, with medical diagnosis of diabetes and congestive heart failure. R3's service plan dated August 26, 2023, indicated R3 required assistance with repositioning scheduled for 11 p.m. and toilet reminders at various intervals: 12 a.m., 2 a.m., 4 a.m., 5:50 a.m., and 10 p.m. Additionally, the resident's assessment dated August 24, 2023, indicated blisters on the right lower leg and the requirement for assistance from one person during transfers.	01480

01480	Continued From page 2 R3's progress note dated August 27, 2023, at 7:01 a.m., indicated R3 was sent to the Emergency room (ER) and there was blood on the floor in his room. R3's incident report dated August 31, 2023, at 6:49 p.m., indicated R3 push his pendent and no one responded, R3 had to call 911 himself due to bleeding from his lower leg. Emergency medical technician (EMT) arrived and waited at the door for 20 min. R3 was sent ER for assistance with the bleeding. R4's admitted on September 9, 2022, with medical diagnosis of diabetes. R4's service plan dated August 26, 2023, indicated R4 required safety check daily at 1 a.m., 3 a.m., 5 a.m. and 7 a.m. R4's progress note dated August 27, 2023, at 8:41 a.m., indicated R4 had an unwitnessed fall and was found at 7:30 a.m. According to R4, he had been on the floor since 10:30 p.m. last night. R4 had no injury besides weakness of his right side and redness both ears and hands. ULP-A was an agency staff and started working for the facility on August 3, 2023. ULP-A worked the night shift of August 27, 2023, where R3 and R4 lived. A review of ULP-A 's employee record did not identify documentation ULP-A received resident-specific orientation. During the interview on January 16, 2024, at 10:01 a.m., ULP-A explained she was an agency staff member originally assigned to work in the	01480

01480	Continued From page 3 memory care unit. However, upon arriving at work, she was asked to work in the assisted living unit. She agreed to this change under the condition a staff member would show her around and provide instructions. Unfortunately, the promised staff member never returned to fulfill this commitment. ULP-A did not have a phone or pager, leaving her unsure about what to do. She acknowledged she learned of R3's fall only after emergency medical assistance arrived at the door. After R3 was transferred to the hospital, CD provided her with a pager to respond to call lights. ULP-A stated she did not have a care sheet to describe the residents' scheduled services, so she did not know what those were. She stated she provided care to residents who activated their call lights, as she was unaware of other scheduled services. During the interview on January 16, 2024, at 10:56 a.m., the clinical director (CD) stated it was ULP-A's third time working for the facility and her first time in the assisted living unit. According to the CD, ULP-A had not logged into the system, and she did not have a pager with her until he came in at 2 a.m. The CD emphasized she was unprepared and merely present. He also mentioned ULP-A did not respond to the call light when R3 injured his leg. R3 had to wait for an hour and called 911 himself. Additionally, the CD noted ULP-A did not check on R4 during his scheduled safety check every two hours. R4 reported falling at 10:30 p.m. and was found on the floor in the morning by another staff. According to the email correspondence, dated January 18, 2024, CD stated ULP-A did not log in, and another staff member working with her signed-off on all the services for the previous two shifts she worked in the memory care unit.	01480
